Tips:
 * Do not make changes to any cells that are underlined. These cells represent running totals. If you make a change to these cells, then the formulas throughout the sheet will become "broken" and the totals will be incorrect.
 * It is useful to keep a running track of the changes made to any service allocation. For example, if you want to change an allocation from \$42,000 to \$40,000, don't just delete the cell contents and type in a new number. Instead, type in "=42000-2000". This shows that you subtracted \$2,000 from a service, so you recall later how you reached a certain amount. If you want to make another change, just add it to the end of the formula. For example, if you want to add back in \$1,500, then the cell should look like "=42000-2000+1500" Make sure you put the "=" in front so Excel reads it as a formula.
