

EARLY INTERVENTION (JAIL ONLY)

Early intervention services (EIS) refers to the provision of HIV testing, counseling, and referral in the Ryan White HIV/AIDS Program setting. In the Houston Area, the Ryan White HIV/AIDS Program funds EIS to persons living with HIV (PLWH) who are incarcerated in the Harris County Jail. Services focus on post-incarceration care coordination to ensure continuity of primary care and medication adherence post-release.

(**Graph 1**) In the 2020 Houston Area HIV needs assessment, 9% of participants indicated a need for *early intervention services* in the past 12 months. 7% reported the service was easy to access, and 2% reported difficulty. 12% stated that they did not know the service was available.

(**Table 1**) When barriers to *early intervention services* were reported, the most common barrier type was interactions with staff (67%). Interactions with staff barriers reported include poor correspondence or follow up, poor treatment, and service referral to provider that did not meet client needs.

TABLE 1-Top 4 Reported Barrier Types for Early Intervention (Jail Only), 2020

	No.	%
1. Interactions with Staff (S)	6	67%
2. Education and Awareness (EA)	3	33%

(**Table 2 and Table 3**) Need and access to services can be analyzed for needs assessment participants according to demographic and other characteristics, revealing the presence of any potential disparities in access to services. For *early intervention services*, this analysis shows the following:

- More females than males found the service accessible.
- More Hispanic/Latino PLWH found the service accessible than other race/ethnicities.
- More PLWH age 18 to 24 found the service accessible than other age groups.
- In addition, more recently released, homeless, transgender, and MSM PLWH found the service difficult to access when compared to all participants.
