

## Testing for HIV and STDs / Prueba del VIH y ETS

If you think that you've been exposed to HIV, you should seriously consider taking an HIV test. This simple medical test is the only way to tell if someone has been exposed to the virus. The test can be done at a doctor's office, a clinic or at a testing site or outreach event. At many public clinics you do not have to give your name, and often the test is free or very low cost. Most testing sites will have tests that give immediate results.

*Si cree que ha estado expuesto al VIH, debería considerar seriamente la posibilidad de hacerse la prueba del VIH. Esta simple prueba médica es la única manera de saber si alguien ha sido expuesto al virus. La prueba se puede hacer en el consultorio de un médico, en una clínica o en un lugar de pruebas o en un evento de divulgación. En muchas clínicas públicas no tiene que dar su nombre, y a menudo la prueba es gratuita o de muy bajo costo. La mayoría de los sitios de pruebas tendrán pruebas que darán resultados inmediatos.*
