

## Testing for HIV and STDs / Prueba del VIH y ETS

If you think that you've been exposed to HIV, you should seriously consider taking an HIV test. This simple medical test is the only way to tell if someone has acquired HIV.

The test can be done at a variety of locations, and some testing programs will come to you. Many times you do not have to give your name, and often the test is free or very low cost. Most sites offer tests that give immediate results.
